Professional Summary

Detail-oriented and solution-driven Django Developer with 4+ years of experience designing, developing, and deploying secure, scalable web applications. Proficient in Python, Django REST Framework, and front-end technologies. Strong background in backend development, API integration, and database design. Adept at collaborating with cross-functional teams to deliver high-quality software solutions.

Core Skills

- Languages & Frameworks: Python, Django, Django REST Framework, JavaScript, HTML, CSS, Bootstrap
- Databases: PostgreSQL, MySQL, SQLite
- Tools & Platforms: Git, GitHub, Docker, Heroku, VS Code
- API Integration: RESTful API development & consumption
- Testing & Debugging: Postman, Pytest, Unit Tests
- Others: Agile methodologies, CI/CD concepts, basic Linux administration

Professional Experience

- Backend Developer (Remote)

OneStop Technologies - Jan 2023

- Developed and maintained backend features for client-facing applications using Django and Django REST Framework.
- Implemented secure APIs for mobile and web apps, improving performance by 30%.
- Worked with frontend developers to integrate APIs and optimize user experience.
- Deployed and monitored applications on Heroku and DigitalOcean.

- Technical Support Specialist

Bleneson Service Nigeria Limited - May 2021 – Dec 2022

- Provided backend technical support for internal systems developed with Django.
- Assisted in deploying applications, patching bugs, and testing features before release.
- Managed server uptime and ensured application stability through proactive monitoring.

Projects

MyShopComplex (Founder & Developer)
A scalable e-commerce platform for fashion and cosmetics products

- Built with Django, PostgreSQL, Bootstrap, and jQuery

- Features include product listings, cart, order management, inventory tracking, and secure admin panel
